

3D Butterfly Model

Assembly Instructions

NB to ensure the model stays in one piece after assembly it is advisable to use a tiny drop of superglue to lock pieces together.

Before glueing any parts make sure you are assembling the model correctly by making it up without glue first. In addition, take care not to get glue onto the turning parts of the wheels and propeller.

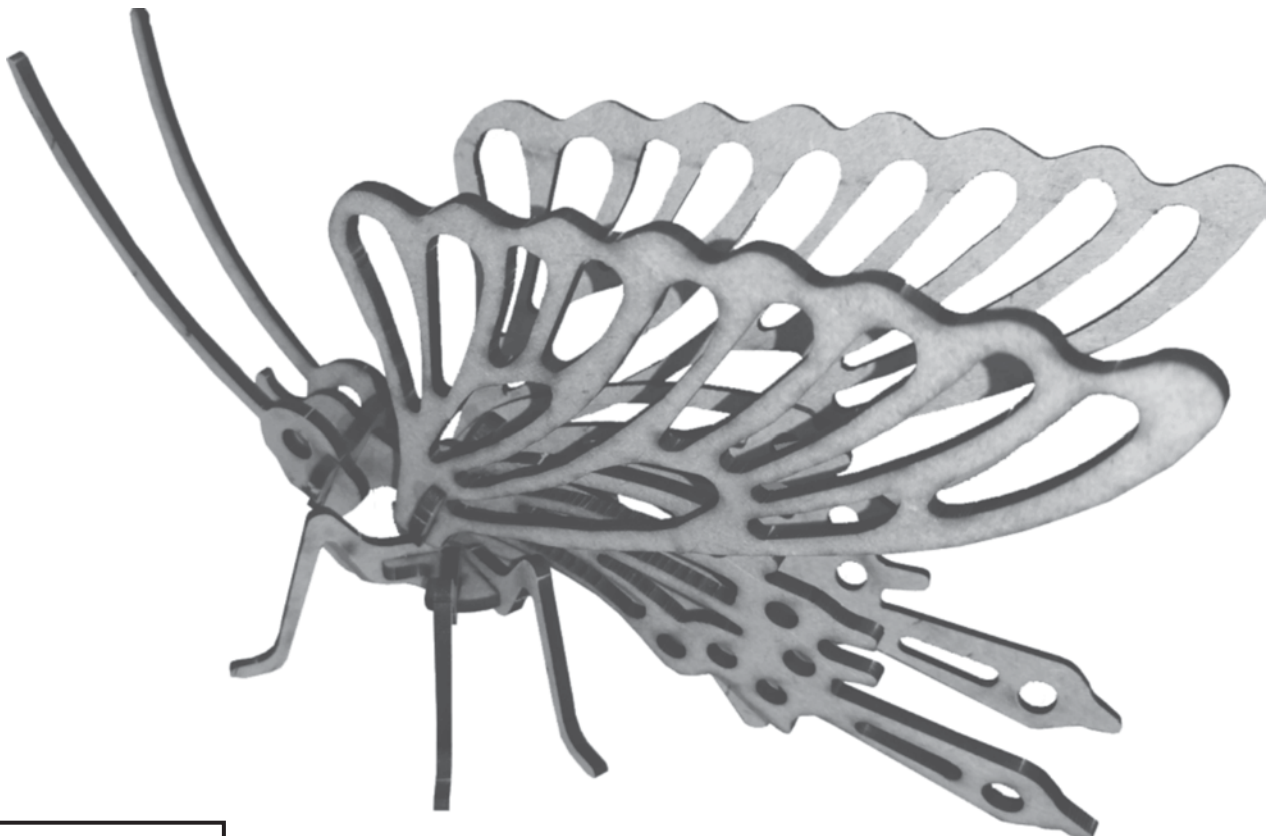

Each piece of the model is numbered for easy assembly.

The letters are the body parts and the numbers are the slots on the parts.

To prevent parts from breaking, remove carefully.

Before you use superglue to permanently glue the butterfly together, use a small ball of prestik to hold the pieces in place to ensure they all fit, allowing you to dismantle the butterfly if required.

1. Attach the head, legs and wing plates to the body **A**
 - a. Slide head plate **B** into slot **1**
 - b. Slide wing plate **D** into slot **2**
 - c. Slide leg plate **F** into slot **3**
2. Attach the two butterfly faces **E** onto head plate **D**
3. Attach the butterfly legs **G** x6 to leg plate **F**
4. Wing assembly **C1** x2 and **C2** x2.
 - a. Slide larger wing **C1** and smaller wing **C2** into slot **4** on both sides of the body.
