

Solar System Puzzle

Instructions

It is a mock-up of the solar system, which brings awareness of the size of individual planets in relation to each other.

Break loose the planets at the bottom of the wooden puzzle and place them into the correct shapes (blank spaces) on the solar system (above) and see around what orbits planets move around, learn their names and order.

The planets are:

Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune, as well as dwarf planets such as Pluto, dozens of moons and millions of asteroids, comets and meteoroids.

You can paint the entire solar system with Acrylic paint.
